PROFILE

Junior Data Engineer with 4 years of production SQL on high-volume banking systems (DB2 and Control-M batch processing at BBVA Technology) and an internship at Babel with Azure Data Factory, SQL Server and Power BI. MSc in Data Science, Big Data & Business Analytics (Universidad Complutense de Madrid, 93.62 average) and First Prize in the master's scholarship competition for a thesis in which I built and ran a 24/7 data ingestion system in production. Looking to join a data team working on Azure or Databricks.

DATA EXPERIENCE

Babel · *Junior Data Analyst (Internship) · BI and Azure Data Factory* Apr 2026 - Sep 2026

Madrid, hybrid · Internal company reporting

- Resolved 3 to 6 data quality incidents per day (mislabelled employee records, mismatches between SQL Server and Power BI, broken visuals) using SQL validation queries.
- Maintained and improved scheduled **Azure Data Factory** pipelines loading into **SQL Server**, plus a recurring daily Python job.
- Maintained **Power BI** reports (DAX, Power Query) on a dimensional model of facts and dimensions (Kimball).
- Flagged the redundant use of two employee keys (one legacy), which led to a development to retire one of them.

BBVA Technology · *Backend and Data Processing Developer, Financial Systems* Nov 2017 - Jan 2022

Madrid · Core banking

- Cut execution time and machine cost of slow processes by up to **50%** by redesigning tables and **SQL logic on DB2**.
- Owned the quality of 3 batch chains with accounting impact (transaction loading, processing and reconciliation) for factoring, confirming and revolving credit, scheduled with **Control-M**.
- Resolved 1 or 2 production incidents per week and handled around 5 user queries per day.
- Developed and maintained batch and online applications in COBOL, JCL and JavaScript.

Stack: SQL (DB2), Control-M, COBOL, JCL, JavaScript

FEATURED PROJECT

Madrid Commuter Rail Delay Prediction · *MSc thesis, UCM · First Prize · team of 5* 2026

- Designed and ran a **24/7** capture on a 5 EUR/month Linux server (3 Renfe GTFS-RT feeds every minute, hourly AEMET weather, daily official timetable): **12 million records in 92 days** at **99.7%** availability.
- Built a **medallion** architecture (bronze as immutable JSON, silver as daily recompacted Parquet) and prepared the data with **PySpark** for modelling.
- Raised the real-time to timetable match rate from 0% to **99.9%** by recovering historical versions the operator does not keep.
- Served the model through a REST API (**FastAPI**) behind the public web app cercanias-madrid.es; the team's LightGBM model cut error from 283.2 to 147.7 s (-48%). Coordinated task allocation across the team.

Stack: Python, PySpark, pandas, Parquet, FastAPI, Linux, systemd, cron, GTFS-RT

Pump It Up (DrivenData) · *Machine Learning pipeline* 2026

- Built a reproducible 3-stage pipeline (stacking ensemble, score 0.8230, 7.3% minority class) with an EDA agent in LangGraph and the Anthropic API (RAG with ChromaDB) and a Gradio predictor.

OTHER EXPERIENCE

ARPO Empresa Constructora · *Health and Safety Manager · works for Canal de Isabel II* May 2024 - Aug 2025

- Coordinated 20+ workers from up to 4 companies across 4 parallel sites and cut accidents and incidents by 30%; KPI reporting to site management and client.

Ibersys Seguridad y Salud · *Health and Safety Technician (contractor coordination) · industrial and energy projects* Feb 2023 - Apr 2024

Nidus - Delama & Llorente · *On-site Safety Supervisor · construction* Jun 2022 - Dec 2022

EDUCATION

MSc in Data Science, Big Data & Business Analytics · *Universidad Complutense de Madrid · 93.62 average* 2025 - 2026

MSc in Occupational Health and Safety · *Universidad Francisco de Vitoria · three specialisations* 2021 - 2022

BSc in Industrial Mechanical Engineering · *Universidad de Huelva* 2011 - 2017

CERTIFICATIONS

- Databricks Accredited Data Governance Fundamentals and 8 Knowledge Badges (Lakeflow, Spark Declarative Pipelines, Asset Bundles, DevOps, Performance Optimization) · 2026. In preparation: Databricks Certified Data Engineer Associate.
- Snowflake Platform Skills Badge · 2026 | Big Data Algorithms for Engineering, Global Knowledge (80 h) · 2026

SKILLS

Languages: SQL (T-SQL, DB2), Python (pandas, PySpark), DAX, R, COBOL, JCL

Data and cloud: Azure Data Factory, SQL Server, Databricks, Snowflake, ETL/ELT, medallion architecture, Parquet, dimensional modelling, data quality

Orchestration and systems: Control-M, Apache Airflow, cron, systemd, Linux, Git/GitHub

BI and ML: Power BI, Power Query, advanced Excel, scikit-learn, LightGBM, LangGraph, RAG, FastAPI

Spoken languages: Spanish (native) · English (B2)
