ISMAEL BOVINGDON CASTILLEJO

Data Engineer | SQL, Python, Spark, Azure Data Factory, Databricks, Power BI

Madrid | +34 692 871 279 | ishmaelbovingdon@gmail.com | linkedin.com/in/ismael-bovingdon | github.com/I-Bovingdon

PROFILE

Data Engineer with 4 years of production data processing in banking (BBVA Technology: SQL on DB2, Spark with Scala and PySpark on the Datio big data platform) and 12 months building Azure Data Factory and Microsoft Fabric pipelines and Power BI reports for senior management at Babel. MSc in Data Science and Big Data (UCM) with a thesis that won 1st Prize in the scholarship competition. Mechanical engineer bridging business and technology, analytical and detail-oriented. Available immediately.

PROFESSIONAL EXPERIENCE

Junior Data Analyst | Babel — Oct 2025 - Sep 2026

- Built and maintained pipelines in Azure Data Factory and Microsoft Fabric, with SQL queries on BigQuery and SQL Server.
- Designed data models and Power BI reports (DAX, Power Query) for management, the board and investors, defining complementary KPIs when requirements did not cover the real goal.
- Designed data quality controls and resolved an average of 5 daily reconciliation and mismatch issues in SQL Server.
- Detected duplicate employee identifiers across several tables and took part in designing and executing the relational model unification, reducing execution and query times.
- Automated daily loads, cleansing and backups with Python, with pytest tests, Git and GitHub pull requests, and CI/CD deployments across environments.

Health & Safety Manager, civil works | ARPO (client: Canal de Isabel II) — May 2024 - Aug 2025

- Coordinated 20+ workers across 4 parallel sites for Canal de Isabel II, with up to 6 companies working simultaneously on the same site; cut accidents by 30%, passed 100% of inspections and audits and produced weekly KPI reports in Excel.

Previously: Senior Occupational Health & Safety Technician at Ibersys (Feb 2023 - May 2024) and Safety Officer at Nidus (Jun 2022 - Dec 2022).

Mainframe Developer, data processing and analysis (SQL DB2, Spark) | BBVA Technology — Nov 2017 - Jan 2022

- Owned the quality of 3 batch chains with accounting impact (load, processing and reconciliation) in factoring, confirming and revolving, with millions of records per day in DB2, and cut the runtime of slow processes by up to 50%.
- Modified Spark jobs in Scala and PySpark on Datio, BBVA's big data platform, integrating mainframe files into ingestion flows and validating results with SQL and Hive.
- Adapted dozens of processes in 30 days to the 2020 pandemic credit and payment relief measures, with an estimated reach of 4 million customers.
- Assessed the impact of changes ranging from one week to one quarter, planned deliveries with the Product Owner in Scrum and coordinated testing with Datio, business and other departments.

PROJECTS

Thesis: Madrid commuter rail delay prediction (1st Prize, scholarship competition) | cercanias-madrid.es — 2026

- Built the 24/7 ingestion of Renfe GTFS-Realtime and AEMET feeds with a raw layer and daily compaction to Parquet (12M records in 92 days, 99.7% availability), and deployed the FastAPI API and web app on a Linux server. Coordinated a remote team of 5.

Pump It Up | Machine learning and LLM — 2026

- Machine learning pipeline on 59,000 water pumps (stacking ensemble, 0.8230) with a Gradio predictor, an assistant built with LangGraph, RAG and the Claude API, and MLflow tracking.

EDUCATION

MSc in Data Science, Big Data & Business Analytics (GPA 9.7/10) | Universidad Complutense de Madrid — 2026

MSc in Occupational Health & Safety, Senior Technician (3 specializations) | Universidad Francisco de Vitoria — 2022

BSc in Mechanical Engineering | Universidad de Huelva — 2017

CERTIFICATIONS AND ADDITIONAL TRAINING

- 9 Databricks accreditations (Associate and Professional Data Engineering paths, Data Governance), 2026.
- Big Data Algorithms for Engineering (Global Knowledge, 80 h). Snowflake Platform Skills Badge. Certified Scrum Master course (16 h), 2026.

SKILLS

Languages: SQL (T-SQL, DB2, MySQL, Hive, BigQuery), Python (pandas, PySpark), Scala, VBA

Data and cloud: Azure Data Factory, Microsoft Fabric, Databricks, Spark, SQL Server, Power BI (DAX, Power Query), Control-M

Engineering: Git, GitHub, CI/CD, pytest, FastAPI, Linux, Claude Code, GitHub Copilot

Methodology: Scrum, Jira, Confluence

Familiar with: Airflow, dbt, Snowflake, Tableau, scikit-learn, MLflow, LLMs, RAG, LangGraph, Oracle, PostgreSQL

Languages: Spanish (native). English C1.
